521135, Movva, Movva, Krishna Dist.  
andhra pradesh.

## About Me

Detail-oriented and innovative Full Stack Developer and Android Developer(mid) with a good educational foundation in computer science and business systems. Good in Python, Java, HTML, CSS, and Flutter, with a passion for harnessing technology to drive business growth. Experienced in optimizing algorithms and developing AI-driven models through academic projects. Eager to contribute technical expertise and creativity to enhance software development initiatives in a collaborative environment.

## Skills

- Flutter - Dart (Intermediate level)
- Web Development: HTML, CSS & Java script
- AIML & Data Analytics
- Soft Skills: Effective Communication, Team Collaboration, Problem-Solving, Project Management

## Education

- **Bachelor of Computer Science & Business Systems**  
**SRKR EC, JNTUK University** 2021 - 2025
  - \* Notable Coursework: Software Development, Data Structures, Algorithm Design, AI & Machine Learning, Data Science etc.
  - \* Academic Project: Developed an AI-based model for enhancing system efficiency through optimized algorithms.
- **Board of Intermediate Education**  
**Vijaya Junior college** 2019 - 2021
  - \* Notable Coursework: Intermediate mathematics physics chemistry.
- **Board of Secondary Education**  
**SMKZPHS Movva** 2018 - 2019

## Internship and project works

- **Full Stack Development (Java), Internship**  
**SkillDzire** 2023 - 2024
  - I developed a sales webpage during my Full Stack Development Internship, enhancing UI/UX and backend efficiency. I optimized database interactions and ensured responsiveness for seamless user experience.
- **AIML and Data Science, Internship**  
**Henotic hyd.** 2023 - 2024
  - During my AI/ML & Data Science Internship, I developed a predictive model to assess bank loan repayment probabilities, leveraging machine learning techniques. I optimized feature selection and data processing to enhance accuracy and reliability.
- **chatGPT course, Internship**  
**BlackBucks** 2024- 2025
  - During my ChatGPT Course, I explored its applications across various software fields, leveraging AI for automation and enhanced user interactions. I integrated ChatGPT into diverse domains like customer support, coding assistance, and data analysis.
- **Customer Segmentation for Marketing using Clustering, Project**  
**Final semester project** 2024- 2025
  - I implemented Customer Segmentation for Marketing using clustering techniques, analyzing customer behavior to identify distinct groups. I leveraged machine learning algorithms like K-Means and DBSCAN to optimize targeted marketing strategies.

## Hobbies

Watching Movies, Outdoor Sports, Travelling, Foodie, Coding, learning new Information and Tech, Playing Video Games, Virtual Life, Discord Mod, Anime and Manga etc.
